SPECIFICATION SHEET

HueCraft Linear merges powerful RGBL technology into a low-profile linear form. Offered in 1, 2, and 4-foot increments, it delivers smooth in-lens quad-chip color blending and consistent transitions across long runs. Built to withstand the elements with an IP67 rating, HueCraft Linear features waterproof quick-connectors for easy installation.

Archi-Color® RGBL

Take your lighting further, drive single color channels up to 80% of fixture power, or dual channels simultaneously at 100%. Achieve bolder effects with greater efficiency.

Now tailored for outdoor applications, our refined RGBL system introduces Lime LEDs for better performance and higher efficacy. The expanded spectrum enhances the colors that matter most outdoors-richer ambers, natural reds, deeper greens, and the golden-yellow glow

reminiscent of sodium lighting. Archi-Color also enables balanced white light mixing, delivering cleaner, more

Notes

- 1. Tailored control modes are available to simulate specific color temperatures or tonal ranges using the native Archi-Color® RGBL quad-chip engine.
- 2. Custom RAL finish please provide RAL number to your representative. Longer lead time required.
- 3. Please specify left or right side for power input when facing the wall to ensure correct mounting orientation.
- 4. Certified to ISO 12944 for high-corrosion environments. Ideal for coastal, marine, and industrial installations exposed to salt, moisture, or pollutants.
- 5. Use of the Glare Shield Visor (GSV) results in an estimated 20% reduction in lumen output.
- 6. Surge protector for up to 10KV. Applicable for unstable mains or facilities using high power machineries.

Approximate lumen outputs can be calculated by applying the following scale factors to the RGBL Full lumen value:

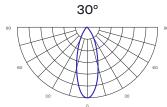

- 3000K = RGBL × 1.19
- 4000K = RGBL × 1.18
- 6500K = RGBL × 1.14

DMX CHART

The HueCraft Linear is a four channel DMX unit. When placing an order, please indicate DMX address. (The DMX address will be listed on the back of the fixture). Do not connect more than 32 fixtures per DMX daisy chain.

DMX ADDRESS (PERSONALITY 1-5)

Channel Fixture #	Red Control (ex. X)	Green Control (ex. X+1)	Blue Control (ex. X+2)	White / Lime / Amber (ex. X+3)
#1	1	2	3	4
#2	5	6	7	8
#3	9	10	11	12

#1	1	2
#2	3	4
#3	5	6

COMPATIBLE DMX CABLING

DMX uses a cable consisting of two twisted pairs plus a shield to carry data. The cable must be specifically impedance matched for the digital DMX signal, meaning that microphone cable or other non-rated cable must not be used to carry DMX. We recommend the use of Belden 9729 or Belden 9841 for DMX installation. Belden 9729/9841 is a two pair cable, which allows for a spare pair for 'out and back' type terminations if needed. A DMX terminator is also required at the end of each DMX chain to ensure proper signal transmission and prevent data reflection.
